Important Information for Symposium Organizers and Prospective Presenters

To improve the convenience and utility of Fall and Annual Meeting technical programs, the TMS Program Committee has approved the desktop publishing of all technical abstracts scheduled to appear in at-meeting programs. Thus, all abstracts will be processed electronically. To reduce the possibility of data-entry errors, symposium organizers have the responsibility of submitting all of their sessions' abstracts on a computer disk. A printout of the text is also required.

Prospective presenters are asked to facilitate this process.

As in the past, papers still must be submitted to the symposium organizers on Abstract Form E. Now, however, prospective presenters should contact the symposium organizer to ascertain if the organizer also wants the abstract to be submitted on a computer disk.

For more information, contact either the symposium organizer at the address in the announcement or the TMS Meetings Department at 420 Commonwealth Drive, Warrendale, PA 15086; (412) 776-9050; fax: (412) 776-3770.
